

USER MANUAL

New Authentication Flows

Security Updates Include:

- Mandatory Mobile Phone Number Login
- Step 3 Selfie Liveness Verification
- Secure Back-office Admin Panel Records

1. Phone Authentication

To enhance wallet safety and security, all users must register a valid mobile number:

1. During signup, fill in your details and phone number in Step 2.
2. Already registered users will be prompted on their next login to register their phone number.
3. The session will reset automatically. Log in again with your email/username and password.

2. Face Liveness Verification

A mandatory face verification prevents bot/duplicate registrations:

1. In Step 3, start the camera or upload a selfie file.
2. Click "Verify Face" to trigger the green liveness scanner.
3. Wait 2.5s for analysis. Once passed, click "Continue" to proceed.
4. Note: Selfie records are kept secure and are only viewable by admins.
